IDENTIFIERS West Virginia

ABSTRACT

Based on the belief that all children have a right to quality care and education, early childhood best practices, and trained staff/providers, this guide details quality standards for early care and education programs in West Virginia, developed through the Early Education Quality Improvement Project (EQUIP). The standards are voluntary and not licensing regulations; rather, the standards guide is designed for use as a self-assessment tool to enable staff/providers and parents to assess how well their program is meeting quality standards, and to develop a plan for continuous improvement. The guide is based on the National Association for the Education of Young Children's Developmentally Appropriate Practice, Birth-8 and Accreditation Criteria, and Procedures of the National Academy of Early Childhood Programs. Following an introduction describing the Quality Improvement Project mission and goals, directions for use, and a glossary of terms, nine sections present the essential elements of early childhood program quality: (1) positive relationships; (2) family involvement; (3) program for child development and learning; (4) staff professionalism; (5) safe, healthy learning environments; (6) health promotion; (7) inclusive practices; (8) effective administration and business practices; and (9) continuity for children and families. Each section describes the rationale for the particular element and states the quality standard(s) (with examples if necessary), the indicators for each standard, the evaluation result, its priority for change, program needs, and notes/comments. Appended is a description of the West Virginia Career Pathway Levels and a form for the continuous improvement plan. (KB)

Website: <http://www.citynet.net/wvfamilies>

The quality standards listed in this document represent "best practices" in continuous improvement of early care and education programs. These quality standards are voluntary and not licensing regulations.

Acknowledgments

The Governor's Early Childhood Implementation Commission and EQUIP (Early Education Quality Improvement Project) gratefully acknowledge the AT&T Foundation and Families and Work Institute for their financial support of the development of the "Essential Elements of Quality for Early Care and Education Programs." We are also grateful for the encouragement and support of the staff from each of the following funding organizations that represent strong partnerships in early care and education in West Virginia.

AT&T Foundation
Families and Work Institute
Claude Worthington Benedum Foundation
Carnegie Corporation of New York
Center for Early Care and Education at Wheelock College

West Virginia would like to acknowledge the State of Oregon, specifically the EQUIP (Early Education Quality Improvement Project) and the Forging the Link Project for their technical assistance and support. The document entitled *Essential Elements of Programs for Children* (draft March 1996) developed by Oregon's Forging the Link Project was used by West Virginia as the basis for this document.

EQUIP Standards Development Subcommittee

The development of the quality standards document was the work of a group of highly dedicated and professional individuals who volunteered their time and expertise to this process. The EQUIP Standards Development Subcommittee:

Marilyn Alvaro, North Central West Virginia Head Start	Lora Fulton, WV Department of Education
Linda Bond, Marion County Board of Education	Webster Gilbreath, Mercer County Economic Opportunity Council
Margy Burns, Youth Health Services	Norma Gray, River Valley Child Development Services
Kay Carpenter, Webster County Board of Education	Helena Kraft, Northern Panhandle Family Child Care Association
Peggy Cartus, WV Department of Health and Human Resources	Rosa McKinney, WV Department of Health and Human Resources
Kay Nottingham Chaplin, Valley Community Mental Health Center	Barbara Merrill, Governor's Cabinet on Children and Families
Karen Cochran, Kinder Haus Child Care Center	Pam Roush, WV Department of Health and Human Resources
Judy Curry, WV Department of Health and Human Resources	Kimberly Veraas, Governor's Cabinet on Children and Families
Cathy Forsythe, LINK Child Care Resource and Referral	

Public Comment Process

A draft document was widely disseminated to provide a period of time from January to March 1997 for review and comments of the proposed voluntary Essential Elements of Quality document by any interested person. The EQUIP Committee made changes when deemed appropriate, based on the public comments and recommendations received from practitioners and parents including a parent affiliate group of the West Virginia Head Start Association.

Resources

This material has been edited, adapted, and expanded to address the values and priorities of West Virginia's young children and families. This document is based on the National Association for the Education of Young Children's (NAEYC) Developmentally Appropriate Practice, Birth-8 and Accreditation Criteria and Procedures of the National Academy of Early Childhood Programs. In an effort to incorporate best practices, the EQUIP Standards Development Committee reviewed recent literature and also consulted with numerous resources including, but not limited to:

- ♦ Colorado Quality Standards for Early Childhood Care and Education Services (November 1994), Colorado Department of Education
- ♦ Family Literacy: An Intergenerational Approach to Learning, A Guide for Schools and Communities (1992), Center for Family Resources
- ♦ Family Literacy Self-Assessment (May 1996), West Virginia Department of Education
- ♦ Head Start Program Performance Standards (April 1996), Head Start Bureau
- ♦ Health and Safety Checklist of Legally Exempt Programs, West Virginia Department of Health and Human Resources
- ♦ Licensing Requirements for Day Care Centers; Family Day Care Home Regulations; Proposed Family Day Care Facilities Regulations; West Virginia Department of Health and Human Resources
- ♦ National Health and Safety Performance Standards: Guidelines for Out-of-Home Child Care Programs (1992), American Public Health Association, and American Academy of Pediatrics
- ♦ Ohio Family and Children First Initiative (March 1996), Office of the Governor
- ♦ Oregon Forging the Link Project: Essential Elements of Programs for Children (draft March 1996)
- ♦ Part H Early Intervention Programs standards/policies 8500-8510, West Virginia Department of Health and Human Resources, Bureau of Public Health, Office of Maternal and Child Health
- ♦ Pilot Standards for Quality School-Age Child Care (1995), National School-Age Care Alliance (NSACA)
- ♦ Policy 2419: Regulations for the Education of Exceptional Students, West Virginia Department of Education
- ♦ The Quality Initiative (June 1995), National Head Start Association
- ♦ Recommended Criteria and Processes for Responding to State and Voluntary National Standards for Education (January 1995) Final Report, A Report to the National Education Goals Panel, Council of Chief State School Officers

ESSENTIAL ELEMENTS OF QUALITY FOR EARLY CARE AND EDUCATION PROGRAMS

INTRODUCTION

The "Essential Elements of Quality for Early Care and Education Programs" document is a result of the Early Education Quality Improvement Project (EQUIP) under the Governor's Early Childhood Implementation Commission of the Governor's Cabinet on Children and Families. It was developed through West Virginia's need to ensure continuity and quality across programs for young children and their families. This work is based on the belief that all children have a right to quality care and education, early childhood best practices and trained staff/providers.

Interest and support for the development of a system of continuity and quality services for young children and their families is evolving from local communities. Parents in need of early childhood services experience difficulty in finding and maintaining quality services. The only way in which quality for children will become common practice is for parents, grandparents, aunts, uncles, communities, neighborhoods, and state agencies to come together in a joint effort to ensure that all programs for children in West Virginia maintain essential elements of quality that reflect best practices in early care and education.

BACKGROUND

The EQUIP project is funded by the AT&T Foundation in four states/communities and coordinated by the Families and Work Institute. It focuses on using a quality audit to assess and improve early care and education services. Four local Family Resource Networks were selected to survey early childhood programs, parents using those programs, and employers. The results were used to develop state and local quality improvement plans, which are being implemented beginning in 1996. In addition, there will be ongoing data collection around quality benchmarks and twenty-five early care and education programs have been recognized statewide as an exemplary program.

PROJECT MISSION AND GOALS

The mission of the Governor's Early Childhood Implementation Commission is to assure the availability of high quality early childhood services and experiences to all preschool children in West Virginia, including health and nutrition, family support and education, and early childhood development and education. Our vision must consider children, families, service providers, the program, the system of services, and funding.

The Early Education Quality Improvement Project (EQUIP) under the Governor's Early Childhood Implementation Commission of the Governor's Cabinet on Children and Families is working to develop a coordinated and collaborative early care and education system that ensures continuity and quality across all programs serving children birth through eight years in group settings.

Two of the goals of the EQUIP Committee are to: 1) determine the essential elements of quality for early care and education programs; and 2) identify and recognize exemplary programs serving young children and their families.

HOW TO USE THE SELF-ASSESSMENT TOOL

The Essential Elements of Quality for Early Care and Education Programs is presented in a simple format for staff/providers and parents to assess how well their program is meeting quality standards, and to develop a plan for continuous improvement. The purpose of working through this Self-Assessment Tool is not to make a perfect score. It is to help each program build a clear profile of its strengths and areas for improvement, and to identify strategies for staff/providers to improve their services to children.

This page of suggested directions is addressed to program staff/providers. On page 83 is a suggested format for building a continuous improvement plan based on the results of this self-assessment.

1. Assemble the people who will help assess your program. It is useful to get several people involved, such as the program director, teachers, and parents, because their different perspectives will collectively produce a more accurate reading.
2. Each person completes the self-assessment tool independently.
3. As a group, review each of the quality standards and rank the program. If the participants disagree on a ranking, choose the lower one suggested. It indicates that someone, at least, believes there is room for improvement here.
4. Under **Priority for Change**, indicate how important it is for your program to address this particular standard. **Goal for the Year** might mean your program is not meeting the standard, and you should take action immediately; **emerging** that you should work on meeting the standard soon, perhaps within the next three months; **in place** that you are fairly satisfied the standard is met, or that meeting it is a lesser concern.
5. In the **Notes/Comments** column, write down anything that may help you in addressing those items you need to work on or in commenting on these standards.
6. In the **Need** column, check technical assistance and/or resource if needed and specify under notes/comments.
7. After the group has reviewed the standards and decided on your rankings, review all the items you chose as **needs improvement**. Rank these again, prioritizing which you want to address first, second, third, etc.
8. Use the **Continuous Improvement Plan** format on page 83 to develop your strategies for priority items. Start with your highest priority, and don't select more than you can realistically accomplish. Describe the steps you will take, who will be responsible, the information and/or resources you will need, and when you plan to finish each task and/or check on your progress.

You may want to adapt this format to better suit your own improvement plan. If there are other areas in which you would like to improve, but that are not reflected in these standards, feel free to add to them.

GLOSSARY OF TERMS

Child-initiated Activities: Experiences where children have choices of activities at learning centers and where they get answers to their questions and construct knowledge by exploring, experimenting, manipulating, and problem solving without being directed by an adult to find one correct answer.

Collaboration: Involves people from different agencies joining together to work toward a common goal. There are seven critical processes in collaboration which include: planning, information and referral services, training and staff development, financing arrangements, case management/case coordination, development of service capacity, and administration and management. An example would be the decision to build and jointly operate a community center that houses school, recreational and social service components.

Community Collaboration: Active participation by the large community is critical to the maximum success of the early childhood program. An organized group of persons, usually an advisory council, which is representative of the home, school, and community should be formed. This council serves as a communication link and provides direction in planning, developing, implementing, and reviewing the early childhood education program. In addition, representatives of the community will be invited to participate in the early childhood program.

Day Care Center: Programs serving 13 or more children in a non-family setting.

Developmentally Appropriate: Refers to offering content, materials, and methodologies, in a language that the child understands, that are commensurate with the child's level of development, and for which the child is ready. This means concrete hands-on experiences in preparation for moving to symbolic levels (letters, numbers, pictures).

Early Care and Education: Provision of purposeful experiences, public or private, aimed at guiding the physical, emotional, intellectual, and social development of young children, birth through eight years.

Essential Elements: The fundamental components necessary to ensure consistent quality across all programs and settings.

Family: Family members include: biological parents (custodial and non custodial); adoptive parents; foster parents; stepparents; grandparents and other relatives of significance to the child; all siblings (half, step, full). In addition, any individual who has extensive contact with the child and/or is a significant person in the child's life could be included.

Family Day Care Homes: Settings serving no more than six children located in a single-family residence.

Family Day Care Facilities: Settings serving no more than 12 children located in a building or a single-family residence.

Family Partnerships: Family members should be respected as equal partners in all phases of the early childhood program. Families are integrated into the early childhood program through opportunities to plan and participate in all states of program development and implementation. Supportive opportunities should be provided for family members to expand their knowledge of child development, increase parenting skills, extend children's learning at home, and utilize community resources.

Inclusive Practices: Children with a wide range of abilities learn from each other in early care and education settings. Inclusive practices exist when all children are viewed as equal members of the learning community though some children may need additional supports for their participation.

Indicators: The specific description of an outcome, condition, process or function of a standard which can be observed or measured and can be used to determine if the standard is being met.

Learning Centers: Areas in the classroom designated for interaction areas (drama, construction, tactile and art media) or curriculum areas (manipulatives for math and fine motor development, materials for language development and science exploration).

Part B: Refers to services for preschool-age children with disabilities and their families.

Part H: Refers to services for infants and toddlers with disabilities and their families.

Staff/Providers: All persons who interact directly with children.

Standard: A statement describing what is expected or considered appropriate and adequate for the operation of a high quality early childhood program.

Standards: The West Virginia *Essential Elements of Quality for Early Care and Education Programs* were developed collaboratively with input from practitioners and policy makers throughout West Virginia. They were designed to help ensure that early childhood programs will provide quality services to help children reach their developmental potential. It is the intent of the authors to provide these standards as a resource and self-assessment guide for practitioners. We hope that the user-friendly format promotes their use to assess, evaluate, and improve existing early childhood programs.

ESSENTIAL ELEMENT: POSITIVE RELATIONSHIPS

RATIONALE: Self-esteem, social skills, and intellectual abilities are enhanced when the program environment promotes warm, positive and respectful interactions. Small groups of children and low ratios of children to adults encourage good relationships. Collaboration is essential among families/caregivers, staff/providers, and community agencies to strengthen the program for the well-being of the children.

QUALITY STANDARD:

A-1 The program environment promotes warm, positive, and respectful interactions among staff/providers, children, and families/caregivers. Adults interact frequently with children showing affection and respect.

INDICATORS:	EVALUATION		PRIORITY FOR CHANGE		NEED		NOTES/COMMENTS
	NEEDS IMPROVEMENT	SATISFACTORY	GOAL FOR THE YEAR	EMERGING	TECH ASST.	RESOURCE	
• Adults interact frequently with children throughout the day, using their names and engaging in one-to-one conversations.							
• Adults provide frequent opportunities for children to interact together.							
• Adults position themselves strategically to be aware of the whole group even when interacting with small groups or individuals.							
• Adults show appropriate affection and respect for children and model positive, culturally sensitive ways to communicate.							
• The sounds in the environment are mostly pleasant conversations rather than harsh voices or enforced quiet.							

QUALITY STANDARD:

<ul style="list-style-type: none"> Recommended staff/child ratios are maintained at all times, including during transport in a vehicle and outdoor play. 										
<ul style="list-style-type: none"> There are a minimal number of transitions or regrouping of children and staff/child ratios are maintained at all times. 										
<ul style="list-style-type: none"> Group size is limited either by walls, dividers or barriers that limit distractions and noise and provide for better supervision and interaction between staff and children. 										
<ul style="list-style-type: none"> Staff/child ratios do not include individuals involved in providing specialized functions, such as bus drivers, cooks, bookkeepers, secretaries or others who are not providing direct care of children or who do not meet the necessary qualifications. 										
<ul style="list-style-type: none"> Substitutes are provided to maintain staff-child ratios when regular staff are absent. 										

QUALITY STANDARD:

A-3 Sufficient staff with responsibility for working directly with children are available to provide frequent personal contact, meaningful learning activities and supervision, and to offer immediate care as needed.

INDICATORS:	EVALUATION		PRIORITY FOR CHANGE		NEED		NOTES/COMMENTS
	NEEDS IMPROVEMENT	SATISFACTORY	GOAL FOR THE YEAR	EMERGING	TECH ASST.	RESOURCE	
• Adults quickly comfort children in distress.							
• Adults reassure crying children.							
• Adults listen to children with attention and respect.							
• Adults listen and respond to children's questions and requests in a friendly and courteous manner.							
• Adults encourage inventiveness, curiosity, and ingenuity.							
• Adults identify and nurture personal capacities to solve problems, evaluate choices, make decisions and take risks.							
• Adults speak with individual children often.							
• Adults speak with children at children's eye level.							
• Adults call children by name.							
• Adults are not only aware of, but also show interest in, children's activities outside of the early care and education setting (e.g., family, sports, Scouts, Brownies).							

Adults talk with individual children and encourage children's language, growth and development.

For example: Adults repeat infants' sounds, talk about things toddlers see, help two-year-olds name things, ask preschoolers open-ended questions, provide opportunities for children in early childhood programs to talk about their day.

INDICATORS:	EVALUATION			PRIORITY FOR CHANGE		NEED		NOTES/COMMENTS
	NEEDS IMPROVEMENT	SATISFACTORY	STRENGTH	GOAL FOR THE YEAR	EMERGING	IN PLACE	TECH ASST. RESOURCE	
<ul style="list-style-type: none"> Every effort is made to have at least one adult available in the program to communicate with a child who speaks a language different than the rest of the children or uses sign language to communicate. 								
<ul style="list-style-type: none"> Adults respect a child's method and style of communication, which could include: <ul style="list-style-type: none"> gestures and jargon, sign language, computer-enhanced learning, other assistive devices, other forms of nonverbal language, and native language. 								
<ul style="list-style-type: none"> Adults facilitate child-to-child communications among all children. 								
<ul style="list-style-type: none"> Adults ask open-ended questions. 								
<ul style="list-style-type: none"> Adults provide opportunities and time each day for conversations based on the children's interest. 								
<ul style="list-style-type: none"> Adults initiate activities and discussions to build positive self-identity and to teach the value of differences. 								

QUALITY STANDARD:

A-5 The program establishes a working relationship with social services agencies, educational resources, medical and health facilities, regulatory agencies, and neighborhoods.

INDICATORS:	EVALUATION		PRIORITY FOR CHANGE		NEED		NOTES/COMMENTS
	NEEDS IMPROVEMENT	SATISFACTORY STRENGTH	GOAL FOR THE YEAR	EMERGING IN PLACE	TECH ASST. RESOURCE		
• Adults are encouraged to become members of interagency committees and regular participants in interagency projects and other collaborative activities in the community.							
• Adults point out contributions of ethnic groups, particularly groups represented by children in the setting.							
• Adults provide all children with equal opportunities to take part in all activities.							

QUALITY STANDARD:

A-6 Staff treat children of all races, religions, cultures, and abilities equally, with respect and consideration.

INDICATORS:	EVALUATION		PRIORITY FOR CHANGE		NEED		NOTES/COMMENTS
	NEEDS IMPROVEMENT	SATISFACTORY STRENGTH	GOAL FOR THE YEAR	EMERGING IN PLACE	TECH ASST. RESOURCE		
• Adults integrate activities related to ethnicity, religion, and culture on a daily basis, not just on holidays or special occasions.							
• Adults point out contributions of ethnic groups, particularly groups represented by children in the setting.							
• Adults provide all children with equal opportunities to take part in all activities.							

Adults encourage independence in children through appropriate age and developmental choices.

INDICATORS:

- Adults encourage children to acquire self-help skills.
For example:
Infants: finger-feeding self.
Toddlers: washing hands, selecting own materials.
Threes and fours: dressing, picking up materials.
Fives: setting table, cleaning, acquiring self-help skills.
Primary students: performing responsible jobs, participating in community activities.

QUALITY STANDARD:

A-8 Adults use positive guidance techniques and approaches to help children act responsibly. Consistent guidance is used by adults and rules are developed together by children and staff.

NOTE: The aim of discipline is to help children eventually become self-disciplined. Restraint and corporal punishment do not develop self-discipline skills and are not acceptable guidance methods.

INDICATORS:

- Adults model appropriate behavior.
- Staff plans ahead to prevent problems.
- Consistent guidance is used and rules are developed.
- Staff use positive reinforcement and encouragement that are specific to the task.

QUALITY STANDARD:

A-8 Adults use positive techniques of guidance and positive approaches to help children act responsibly. Consistent guidance is used by adults and rules are developed together by children and staff.
NOTE: The aim of discipline is to help children eventually become self-disciplined. Restraint and corporal punishment do not develop self-discipline skills and are not acceptable guidance methods.

	NEEDS IMPROVE-MENT	SATISFACTORY	STRENGTH	GOAL FOR THE YEAR	EMERGING	IN PLACE	TECH ASST.	RESOURCE	
<ul style="list-style-type: none"> Adults' expectations of children's social behavior are developmentally appropriate. <i>For example:</i> A variety of similar equipment is available so toddlers are not forced to share too often. Preschoolers are encouraged to cooperate in small groups. Children in early childhood programs have opportunities to participate in group games, cooperative learning, and partner activities, or to work or play alone. 									
<ul style="list-style-type: none"> Adults provide opportunities which enhance children's internal motivation for acquiring competence. 									

ESSENTIAL ELEMENT: FAMILY INVOLVEMENT

RATIONALE: Parents play the primary, critical role in supporting their children's growth and development. Effective early care and education programs include families as partners in the planning, implementation, and evaluation of day-to-day activities. Programs build and support this partnership — and they provide continuity and consistency with children's home lives — when they offer a variety of meaningful opportunities for families to participate and when they communicate regularly with parents and others who are significantly involved with the children. Practices are family-focused when they show respect for the family's role in children's lives and acknowledge the impact of parents and other family members as children's first and most influential teachers. Effective programs acknowledge and accommodate, as much as possible, the diversity in today's family structures and backgrounds. Staff/providers invite families to approach them with any concerns or suggestions. Confidentiality is always respected. Limited program resources make it unrealistic to expect that every program will be equipped to deal with all the needs that face today's children and families. Staff/providers should be knowledgeable about community services and resources that can supplement those of the program. By providing early care and education services and referrals to families in such areas as health, nutrition, social services, and transportation, programs can help knit together a unified early care and education system.

• Special dietary needs for children are accommodated.							
• Menus are available for families.							
• Infants are held and talked to while bottle fed.							
• Children and staff/providers eat together, sharing the same menu and socializing in a relaxed atmosphere.							
• Tables and chairs are child-sized, comfortable and conducive to independence.							
• Eating utensils are age-appropriate, adapted for the children's abilities, and sanitized before each use.							
• Food is not used as punishment or reward.							
• Children are encouraged but not forced to eat or taste.							
• Children are given sufficient time to eat.							
• Meal times and foods are used as opportunities for nutrition education.							
• Staff/providers and families receive information on nutrition and sound eating habits.							

ESSENTIAL ELEMENT: INCLUSIVE PRACTICES

RATIONALE: Valuing human uniqueness is a goal of quality early care and education programs. Practices that are responsive to and respectful of individual differences promote acceptance of each person, positive self-esteem and strong cultural identity. Children with disabilities and developmental delays are more likely to develop positive social skills when integrated with their typically developing peers. Children who experience diversity learn about basic similarities of all people and appreciate their differences. When staff/providers promote fairness and work to counter prejudice, all children can feel safe and valued.

QUALITY STANDARD:

G-1 Those providing services for children and their families understand and commit to practices which build on each child's culture, language, strengths and interests.

APPENDICES

150

151

WEST VIRGINIA CAREER PATHWAYS LEVELS

152

153

WEST VIRGINIA CAREER PATHWAY LEVELS

competency levels and appropriate developmental practices describe expected attributes, skills and abilities of all people who work with young children (ages birth through eight years) and their families. Training and understanding of core competencies is the same for all who work in an early childhood setting. The level of competence, skills, abilities and understanding increases as staff/providers become more experienced and assume more responsibility, especially in the areas of programming, advocacy, training and supervision. A supervisor is to have a higher level of education and/or more years of experience than the person being supervised.

These competency levels are based on core competencies used by CDA (Child Development Associate National Credentialing Program), and Guidelines for Preparation of Early Childhood Professionals (1995) used by NAEYC (National Association for the Education of Young Children). The Child Development Associate Credential (CDA) is a federally funded early childhood credential administered by the Early Childhood Council for Professional Recognition, a division of the National Association for the Education of Young Children.

Seven levels of competency reflect experience and/or formal educational accomplishments. Individuals at all levels must be at least 16 years of age, have no criminal record and be in good health. A physician's statement is required indicating that the individual is in good health to work with young children and has evidence of current immunizations.

The abilities in each level are cumulative. Individuals must demonstrate proficiency in the core competency abilities listed in each previous level as well as in their level of professional development. All levels require up-to-date first aid certification, including rescue breathing.

Level I:

Individuals at this level must be at least 16 years of age and be enrolled in high school or GED preparation classes. They conform to core competencies (see attached) by following the directions and instructions of their supervisors.

Level II:

Individuals at this level must be at least 18 years of age, have a high school diploma or its equivalent and have an interest in working with young children. Staff/providers at this level have 0-1 year of experience working with young children and will assist other staff/providers. They understand and practice core competencies with direction and instruction from their supervisors.

Level III - CDA:

Staff/providers must have:

1. A Child Development Associate (CDA) certificate or its equivalent (12 semester hours of college credit in early care and education related courses and a minimum of 300 clock hours of supervised field experience with infants, toddlers, preschoolers or school-age children with diverse abilities, and in diverse settings).

Experience Exemption: ten (10) years of full time occupational experience (averaging a minimum of 1200 clock hours per year) in a licensed facility, a public school program, Head Start program, a registered family child care home or an early intervention program.*

Staff/providers at this level practice and implement programming, under supervision, which conforms to core competencies.

* Experience exemption: The effective dates and time periods of the experience exemption will be determined once the system is operational. Staff/providers with 10 years of prior, relevant occupational experience by (date) may bypass formal credentialing and educational requirements and advance to Level III. This exemption clause will be in effect for (time period) and will expire on (date).

Staff/providers must have:

1. U.S. Department of Labor Apprenticeship Certificate

or

2. Certificate Program in Child Development or equivalent (32-34 semester hours of college credit) + 1 year of experience (a minimum of 1200 clock hours per year).

Experience Exemption: fifteen (15) years of occupational experience (averaging a minimum of 1200 clock hours per year) in a licensed facility, a public school program, Head Start program, a registered family child care home or an early intervention program.**

Staff/providers at this level *plan and adapt programming*, under supervision, which conforms to core competencies.

Level V - Associate Degree:

Staff/providers with an Associate Degree in child development, early childhood or a related field (equivalent = 62-64 semester hours of college credit, which includes at least one practicum experience with young children) *make curricular decisions*, under supervision, which conform to core competencies.

Level VI - Bachelor's Degree:

Staff/providers with a Bachelor's Degree in child development, early childhood or a related field (equivalent = 120 semester hours of college credit with a minimum of 9 hours of early childhood or child development course work as part of the degree or within the first year of employment) and/or with birth-5 certification *develop, select and evaluate the early care and education program* to insure that it conforms to core competencies. In addition, they *apply theory into practice and help others understand this application of theory*.

Level VII - Advanced Degree:

Staff/providers with a Master's Degree or higher in child development, early childhood or a related field (must include a minimum of 9 hours of early childhood or child development course work as part of the degree or within the first year of employment) *are directly involved in the activities of state, regional and/or national groups* who advocate for children, and *contribute to the formation, evaluation and implementation of policies* within the field of early childhood.

** Experience exemption: The effective dates and time periods of the experience exemption will be determined once the system is operational. Staff/providers with 15 years of prior, relevant occupational experience by (date) may bypass formal credentialing and educational requirements and advance to Level IV. This exemption clause will be in effect for (time period) and will expire on (date). This exemption clause will be in effect for (time period) and will expire on (date).

Explicitly understood that these competencies are necessary to promote the optimal development of all children, including those with special needs and that activities and environments should be adapted to accommodate each child's learning modality and style.

Safety

- Provides a safe environment to prevent and reduce injuries;
- Is attentive to children's activities;
- Has skills and knowledge to prevent injuries and handle emergencies and injuries appropriately when they occur;
- Has formal training and up-to-date Certification in First Aid for children, including rescue breathing; and
- Recognizes indicators of child abuse and neglect.

Health

- Is familiar with what diseases require exclusion of children; what diseases and conditions can be included in the regular classroom;
- Models and promotes good health and nutrition habits;
- Provides environment that contributes to the prevention of illness;
- Nurtures children's developing identity and feelings of self-worth;
- Integrates health care activities into the curriculum;
- Can identify symptoms of common early childhood illnesses;
- Provides for nutritional needs of children as specified under USDA; and
- Can demonstrate effective procedures to prevent the spread of disease.

Environment

- Appropriately addresses issues of space, social relationships, materials and routines in setting the environment;
- Creates an interesting, secure and enjoyable environment that encourages play, exploration and learning;
- Support a broad array of experiences;
- Establishes a reliable routine;
- Maintains an appropriate adult/child ratio; and
- Environment encourages visits and participation by parents, such as having comfortable adult chairs, adult coat storage, etc.

Physical Development

- Provides a variety of equipment, activities and opportunities to promote the physical development of children;
- Provides for physical development, including large and small muscle strengthening, coordination and control;
- Recognizes, respects and accommodates wide differences in individual rates of physical development;
- Demonstrates an understanding of patterns and stages of a child's physical growth; and
- Observes and discusses with parent and notes in writing any unusual patterns of growth or unusual behavior that might be related to physical capability.

Cognitive Development

- Provides activities and opportunities that encourage curiosity, exploration and problem-solving;
- Uses developmental criteria and understanding of learning styles in working with children;
- Responds to children's interests by providing new learning opportunities;
- Responds to children's questions with information and enthusiasm;
- Respects the relationship of cognitive development with other areas of development (physical, social and emotional);
- Demonstrates an understanding of patterns and stages of a child's cognitive growth; and
- Understands and can explain to parents the ways in which each of the activities for children contribute to cognitive development.

Development of Creativity

- Provides opportunities that stimulate children to play with sound, rhythm, language, materials, space and ideas in individual ways;
- Supports and respects children's expression of creative abilities;
- Encourages spontaneous expression; and
- Expands children's imaginations.

Communication

- Communicates verbally and non-verbally with other staff to create a well-functioning team;
- Models good communication skills;
- Provides opportunities and support for children to understand, acquire, and use verbal and non-verbal means of communicating thoughts and feelings;
- Provides ample opportunity for children to listen, interact, and express themselves freely with other children and adults; and
- Demonstrates an understanding of patterns and stages of a child's language development.

Self

- Provides physical and emotional security for each child;
- Helps each child to know, accept and take pride in himself/herself;
- Helps children develop independence;
- Demonstrates and encourages respect for and valuing of cultural, racial, gender, socio-economic and physical ability differences;
- Supports child's self-esteem by providing opportunities for children to master new abilities, to experience success and safely make mistakes;
- Helps children find their own ways to handle increasingly challenging tasks;
- Demonstrates an understanding of patterns and stages of a child's self growth;
- Recognizes each child as a unique person and establishes a caring relationship; and
- Recognizes each child's identity as part of a family and works in partnership with parents.

Social

- Helps each child feel secure and accepted in the group;
- Helps children learn to communicate and get along with others;
- Encourages feelings of empathy and mutual respect among children and adults;
- Integrates multicultural/anti-bias themes, literature and experience in all curriculum areas;

- Demonstrates an understanding of patterns and stages of a child's social development; and
- Demonstrates the ability to facilitate the development of group cooperation among the children; and to contribute to a feeling of community and family supportiveness in the program as a whole.

Guidance

- Provides a supportive environment in which children learn and practice appropriate and acceptable behaviors;
- Provides consistent limits and realistic expectations;
- Clearly and positively defines expectations;
- When setting expectations, takes into account each child's development and needs;
- Support children's efforts to independently resolve their own problems;
- Discusses guidance with parents and makes sure that children understand any differences in approach between the home and the program; and
- Demonstrates ability to use positive methods of guidance rather than punishment.

Families

- Supports the family's role as primary caregiver and teachers of their children;
- Accepts and supports each child's cultural, racial and socio-economic background;
- Creates and maintains open, friendly, cooperative relationships with each child's family;
- Encourages each family's involvement in the program in a variety of ways, responsive to each family situation;
- Supports the child's relationship with his/her family;
- Accepts the diverse values of families;
- Individualizes community resources for families;
- Recognizes children and families with emotional distress, abuse and neglect and provides avenues of assistance;
- Establishes regular communication with parents to gain needed information about the child's life outside the program and give parents needed information about the child's play; and
- Generates opportunities for the program and parents to collaborate.

Program Management

- Works cooperatively with co-workers and families;
- Has a systematic approach to organizing, planning, and keeping records;
- Delegates responsibility;
- Uses all available resources to ensure effective operation;
- Keeps accurate records of needs, plans and practices; and
- Observes and records children's behavior, makes plans based on observed needs.

Professionalism

- Makes decisions based on knowledge of early childhood theories and practices;
- Promotes quality in early care and education services;
- Takes advantage of opportunities to improve competence;
- Continues to set new goals, takes initiative;

- Works to resolve issues and problems cooperatively and respectfully;
- Advocates for quality early care and education;
- Develops relationships with other early care and education professionals for support and information exchange; and
- Joins professional organizations and plays a responsible role.

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: West Virginia "Essential Elements of Quality for Early Care and Education Programs"	
Author(s): Governor's Cabinet on Children & Families -- West Virginia	
Corporate Source:	Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

The sample sticker shown below will be affixed to all Level 2A documents

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY
